

MUS 123—Assignment #5

[10% of Total Course Grade]

[65 points total]

Turn in your assignment with this worksheet. Use pencil and be sure that your work is neat and legible!

Part I: Segmentation [25 points]

Segment the first 24 measures of the attached melody by identifying dividing caesuras. Your segments should be no longer than 3 measures (i.e., all should be snippets/*Einschnitte*).

- To indicate these caesuras, use brackets or v's.
- Justify the location of each caesura you've identified.
 - (this usually requires only a couple words)

Remember that the most common musical features that create caesuras are (1) rests, (2) pauses caused by longer note values, (3) the repetition of a musical idea, (4) lyrics/text, and (5) harmonic changes, including cadences. Caesuras, of course, can be created by other musical features. If you find a moment in this melody where you think this is the case, briefly describe it.

Part II: Cadence Identification [15 points]

Phrases end with a cadence: label every try cadence by type and key (e.g., FM: PAC, Am: IAC, DM: HC). After identifying the cadence, give a roman numeral analysis of the harmonies belonging to **the cadential progression**.

"Mit dem grünen Lautenbande" a simple song from Schubert's *Die schöne Müllerin* (1823)

Mässig.

Singstimme.

Pianoforte.

Part III: Part Writing [25 points]

(-1 for every outer-voice error, -0.5 points for every inner-voice error)

Harmonize the following melody in a **keyboard style**.

- Begin by choosing suitable harmonies that follow the phrase model
- Write the bass line
- Continue by writing inner voices
- Conclude by providing a roman numeral analysis of your harmonic progression.
